

Konservasi Indonesia is a national foundation established to support sustainable development in the country. We are the main partner of Conservation International in Indonesia. For more information, please visit: [www.konservasi-id.org](http://www.konservasi-id.org)

We envision a healthy and prosperous Indonesia where biodiversity is valued and preserved. With offices and project sites across Indonesia, we promote a sustainable landscape-seascape approach and establish partnerships with multiple stakeholders across sectors and jurisdictions to deliver lasting impacts for people and nature in Indonesia.

As we are constantly expanding, we are currently hiring to fill the following position for our office in **Jakarta**:

---

## **Nature Climate Solution and Biodiversity Policy Coordinator**

**(Code: NCS BD-PC)**

---

Yayasan Konservasi Indonesia (KI), Conservation International's (CI) main partner in Indonesia, envisions a healthy and prosperous Indonesia where biodiversity is valued and preserved. With offices and project sites across Indonesia, we promote a sustainable landscape-seascape approach and establish partnerships with multiple stakeholders across sectors and jurisdictions to deliver lasting impacts for people and nature in Indonesia.

Nature plays a critical role in the global climate system. Studies say that nature contributes 30% of the way to solving the climate crisis. Konservasi Indonesia adopts a Nature Climate Solution (NCS) strategy in its sustainable landscape seascape approach. The strategy focuses on securing and protecting critical ecosystems, restoring degraded areas, and improving production practices. In parallel, Konservasi Indonesia also contributes to the conservation of biodiversity in Indonesia through supporting Government of Indonesia in data collection, policy formulation, and mapping.

With the growing demand for expertise and opportunities in both fields mentioned above, we are looking for a NCS and Biodiversity Policy Coordinator who will support our NCS policy work (climate change mitigation and adaptation efforts, specifically on the carbon pricing mechanism), assist NCS project development when feasible, conduct ecosystem services and biodiversity valuation, as well as explore biodiversity financing schemes (payment for ecosystem services, biodiversity credits, green bonds, etc).

We desire to see outputs in the form of policy recommendations (drafts of laws, government regulations, guidelines, etc.), strategic engagement with state and non-state actors to ensure the incorporation of policy recommendations, and collaboration with other staff on NCS and biodiversity-related matters. In terms of strategic engagement, the Policy Coordinator will have to maintain the network and engage with, among others, Coordinating Ministry of Maritime Affairs and Investment, Ministry of Environment and Forestry, Ministry of Planning; and non-government stakeholders, research center, and other actors dealing with NCS and biodiversity in Indonesia. The Policy Coordinator will possibly be assigned temporarily in a particular government office to provide technical assistance, when needed.

### **KEY RESPONSIBILITIES**

- Support the Policy Team and other staff in reviewing NCS and biodiversity policy instruments;
- Support the Policy Team and other staff in developing the NCS and biodiversity policy recommendations and engagement with relevant policymakers;
- Be assigned temporarily to the government office to provide direct technical assistance on the NCS and biodiversity policies;
- Represent KI and ensure effective communications, consultation, and information sharing with relevant government stakeholders and partners;
- Work closely with KI's Senior Management Team, advisors, program staff, and field teams in the ecoregions;
- Assists in organizing and implementing events, meetings, seminars, and workshops targeting key government partners pertaining to NCS and biodiversity;
- Perform related duties as assigned

### **QUALIFICATIONS**

- Bachelor's Degree and 3 years or more with experiences in climate change, environmental public policies, environmental economics, natural resource economics, and business finance. **Advanced degree is preferred.**
- Excellent technical and analytical skills.
- Strong written communication skills in both Bahasa Indonesia and English.
- Strong multi-stakeholder communication and networking skills.
- Ability to work well under pressure both individually and as a team, multitask, set priorities, and deliver quality results.

### **WORKING CONDITIONS**

- Possibility of being assigned to the government office.
- Possibility of traveling for work.
- Ability to work outside the normal work schedule to meet project deadlines.
